

Access to the internet is a basic human right. By allowing ISPs to strike down net neutrality, you are empowering corporations to limit the accessibility of the internet to people, and are violating their first amendment right to free speech.

If the FCC is committed to passing this, I will be in touch with my representatives to encourage them to oppose this plan and call for Pai's resignation.

The FCC is NOT doing its duty with this measure. The FCC will open itself up to greater scrutiny and backlash with this measure.

Protect net neutrality.
